By Cassandra J. Hartnett, Andrea L. Sevetson, Eric J. Forte : Fundamentals of Government Information: Mining, Finding, Evaluating, and Using Government Resources master of science in computer information systems concentration in database management and business intelligence through bu met database design data mining

rinton press a science and technology publisher is founded by a team of scholars and publication professionals and is based in princeton new jersey rinton press Fundamentals of Government Information: Mining, Finding, Evaluating, and Using Government Resources:

0 of 0 review helpful Four Stars By Customer very helpful Government data and resources are uniquely useful to researchers and other library users But without a roadmap sifting through the sheer quantity of information to find the right answers is foolhardy The first edition of this text is well established as an essential navigational tool for both LIS students and professionals now this newly revised peer reviewed update is even more attuned to new sources and types of government information and how best to locate them This is now the only up to date book on this topic The book is probably most useful as a textbook in government documents library school courses but it will also serve public and academic librarians working with government information and general research
