In the 1990s a generation of women born during the rise of the second wave feminist movement plotted a revolution. These young activists funneled their outrage and energy into creating music and zines using salvaged audio equipment and stolen time on copy machines. By 2000 the cultural artifacts of this movement had started to migrate from basements and storage units to community and university archives establishing new sites of storytelling and political activism. Eichhorn uses this book to argue passionately that collecting that is archiving feminism and its by products is never without deep context rich history and radical foresight. Bitch magazine
